## INTRODUCTION

---

### **Transportation Improvement Program (TIP)**

The *Transportation Improvement Program* (TIP) is a staged, multi-year program of improvements scheduled for the Acadiana Metropolitan Planning Area. The Acadiana Planning Commission, being the state-designated Metropolitan Planning Organization (MPO) for the Acadiana Metropolitan Area, is responsible for the development of this document. This document is a cooperative effort between the Louisiana Department of Transportation and Development and the Acadiana MPO. The STIP is the statewide counterpart to the TIP.

### **Compliance with the FAST (Fixing America's Surface Transportation act): (FAST)**

The Safe, Affordable, Flexible, Efficient Transportation Equity Act: A Legacy for Users of 2019 (FAST) was designed to direct the development of a “national intermodal transportation system that is economically efficient and sound, provides the foundation for the nation to compete in a global economy, and will move people and goods in an energy efficient manner.” The TIP plays an integral part in this mission by providing a party list of projects and project segments to be constructed within a four (4) year period following the program's adoption. Because of the passage of FAST, the TIP must:

1. Incorporate all improvements to be completed within the Metropolitan Area, including Public Transit, Pedestrian and Bikeway improvements, Safety Improvements, and Enhancements;
2. Incorporate a financial plan that demonstrates that the projects selected can be implemented within the defined time frames;
3. Incorporate a priority list of projects to be carried out in each year of a four-year period;
4. Include transportation projects that are consistent with the long-range transportation plan approved and adopted for the Metropolitan Area.

### **Compliance with the Financial Plan Requirement**

All the projects listed within the program, with exception of transportation enhancements, have identified sources of federal, state, or local revenues. Transportation Enhancement projects are included within this document in response to application requirements which establish listing of projects in the adopted TIP as a prerequisite to consideration for funding.

### **Projects Adoption Procedure**

The Citizen Advisory Committee (CAC) is charged with reviewing transportation related issues and advising such to the TTC. The Transportation Technical Committee (TTC) is charged with the responsibility of reviewing and recommending for adoption the proposed program of projects to be covered within this document. The Transportation Policy Committee (TPC), charged with the responsibility of adopting the proposed program, has the final recommending authority on all projects involving Federal or State funding. Once the TIP program is adopted, it is submitted to the Louisiana Department of Transportation and Development and the Governor for approval and inclusion into the State of Louisiana Transportation Improvement Program.

# MPO URBAN AREA

## DEFINITIONS

---

Arterial Street – A major street, primarily for through traffic, characterized by a high traffic volume capacity coupled with unlimited access to adjacent streets, not designed as a highway.

Area Source – Small stationary and non-transportation pollution sources that are too small and numerous to be included as point sources but may collectively contribute to air pollution.

CAAA: Clean Air Act Amendments of 1990 – Legislation that identifies mobile sources as a major source of pollution and calls for stringent new requirements in metropolitan areas and states where attainment of the NAAQS is contested.

Carbon Monoxide (CO) – A colorless, odorless, tasteless gas formed in a large part by the incomplete combustion of fuel.

Emission Inventory – A complete list of sources and amounts of pollution within a specific area and time interval.

EPA: The Environmental Protection Agency – Federal agency created in the *Environmental Protection Act of 1970* that is responsible for enforcing, monitoring, and maintaining federal environmental laws.

Federal Aid Urbanized Area – An area that contains at least 50,000 people and has sufficient population density to be classified as urban by the Federal Highway Administration.

FHWA: The Federal Highway Administration – An agency of the U.S. Department of Transportation with jurisdiction over highway and bridges. FHWA administers the Federal Lands Highway program.

ISTEA (Intermodal Surface Transportation Efficiency) Act of 1991 A major piece of Federal legislation that implements broad changes in the way transportation decisions are made. ISTEA emphasizes diversity and balance of modes and the preservation of existing systems. It imposes a series of environmental, social and energy factors that must be considered in planning, programming, and selection of projects.

La DEQ: The Louisiana Department of Environmental Quality – The State of Louisiana agency with jurisdiction over environmental regulation.

La DOTD: Louisiana Department of Transportation and Development – The State of Louisiana agency with jurisdiction over transportation.

Level of Service (LOS) – A combination of operating conditions of a given facility that allows it to accommodate Traffic Volumes.

Fixing America's Surface Transportation act (FAST) – Most recent Transportation Bill adopted on December 4, 2015.

Metropolitan Boundaries – The area represented by the existing urbanized area and the contiguous area forecasted to be urbanized in a 20-year horizon for the region. The area may include the entire metropolitan statistical area as designated by the Bureau of the Census or

another area as agreed upon by the governor and MPO. Unless agreed upon by the metropolitan organization and the governor, the area must also include the area of nonattainment of the NAAQS as defined by the CAAA.

Metropolitan Area – An area with a population of at least 50,000 as defined by the Bureau of the Census.

MPO: The Metropolitan Planning Organization – An organization established by the Governor and units of local government which represent 75% of the affected population to carry out the transportation planning process as required in the Section 134 of Title 23 of the United States Code as defined by Moving ahead for Progress in the 21<sup>st</sup> century (FAST).

Mobile Source – Mobile sources include motor vehicles, aircraft, seagoing vessels, and other transportation modes. The mobile source related pollutants are carbon monoxide (CO), hydrocarbon (HC), oxides of nitrogen (NO<sub>x</sub>), and small particulate matter (PM<sub>10</sub>).

National Ambient Air Quality Standards (NAAQS) – Federal standards that set allowable concentrations and exposure limits for various pollutants. The standards are developed by the Environmental Protection Agency (EPA) in response to the requirements of the Clean Air Act and subsequent amendments.

Nonattainment Area – A geographic region of the United States that has been designated not complying with the NAAQS by the EPA.

Ozone (O<sub>3</sub>) – Ozone is a colorless gas with a sweet odor. It is not a direct emission from transportation sources. Ozone is a secondary pollutant formed when hydrocarbons and oxides of nitrogen combine in sunlight. The ozone is associated with smog and haze conditions. Although the ozone in the upper atmosphere protects us from harmful ultraviolet sunlight, ground level ozone produces an unhealthy environment in which to live.

Stage II Vapor Recovery System – A program designed to reduce hydrocarbon emissions during refueling.

State Implementation Plan (SIP) – A plan mandated by the Clean Air Act and subsequent amendments that contains procedures to monitor, control, maintain, and enforce compliance with NAAQS.

TRANSPORTATION CONTROL MEASURES (TCM) – Specific measures that reduce emissions by reducing vehicle use and/or controlling traffic flow.

TRANSPORTATION DEMAND MANAGEMENT (TDM) – Specific measures that reduce demand for transportation demand by promoting transit and/or utilizing work hours.

TEP – The Transportation Enhancement Program that is a federally funded program administered through the LA DOTD. It aims to build a more balanced transportation system that includes sidewalks for pedestrians and bike-path for bicyclists and any mobility impaired person using a wheel chair. It can include safety and educational activities for pedestrians and bicyclists, landscaping and other scenic

beautification, historic preservation, acquisition of scenic easements and scenic or historic sites, preservation of abandoned railway corridors, scenic or historic highway programs including the provision of tourist and welcome center facilities, archaeological planning and research, control and removal of outdoor advertising, environmental mitigation and establishment of transportation museums.

To simplify the reading of this document, a following list of the commonly used abbreviations is provided:

<u>Abbreviation</u>	<u>Translation</u>
AS	Alignment Study
ADT	Average Daily Traffic
BEP	Bike, Equestrian, and Pedestrian Project

**Joint Certification of the Metropolitan  
Transportation Planning Process**

In accordance with the federal legislation, 23 Code of Federal Regulations 450.336 and the Fixing America's Surface Transportation (FAST) Act, the Louisiana Department of Transportation and Development (LADOTD), and the Acadiana Metropolitan Planning Organization for the Lafayette urbanized area hereby certify that the transportation planning process is addressing the major issues in the metropolitan planning area and is being conducted in accordance with all applicable requirements of:

1. 23 U.S.C. 134, 49 U.S.C. 5303, and this subpart;
2. In nonattainment and maintenance areas, sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d) and 40 CFR part 93;
3. Title VI of the Civil Rights Act of 1964 as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
4. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
5. Section 1101(b) of the FAST Act ( Pub. L. 114-357) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in DOT funded projects;
6. 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
7. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, and 38;
8. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
9. Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
10. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities

## TRANSPORTATION IMPROVEMENT PROGRAM (TIP) REFERENCE

---

Improvements listed in this **TIP** are defined by the following:

- A. **Improvement Name:** Generally, the name of the improvement is referenced by a local street, road, or highway. State Projects may include a “Route Number.”
- B. **Improvement Description:** Describes the transportation improvement.
- C. **Improvement State:** All improvements are implemented through a staged process that has a beginning and an end. This reference identifies what working stage, out of four, the transportation improvement is in.
- D. **Improvement Length:** Most transportation improvements reflect linear measurements or the distance (length) of the project from point A to point B. When applicable, this reference identifies the distance in miles and kilometers.
- E. **Federal/State/Local Funds:** Federal, State, and Local transportation improvement agencies have different funding categories or “funds” available through various programs. This reference helps identify the specific program fund source for the project.
- F. **Stage Cost/Total Cost:** Transportation improvement projects can take five, ten or more years to complete. This reference identifies the estimated or projected cost for the entire project and the budget funding allocation for the improvement staged in the current transportation program year.
- G. **Federal/State/Local:** The three primary financial sources for funding the Total Cost of transportation improvements that are **Transportation Funding:** identified with the dollar amounts contributed. Private contributions are included under the local column.
- H. **Sponsoring Agency:** Every transportation improvement has a coordinating or sponsoring agency. Several funding sources may be involved, but usually there is one lead agency responsible for a transportation improvement at any given time.
- I. **LA DOTD ID Number:** The Louisiana Department of Transportation and Development requires a state transportation project number on all improvements with state or state funding participation.
- J. **Federal ID Number:** The Louisiana Department of Transportation and Development requires a state transportation project number on all improvements with federal funding participation.
- K. **Local ID Number:** Where a Federal or LA DOTD number was not applicable, a local project number was assigned to the project. This number corresponds to project numbers found within the sponsoring agency’s designated Capital Improvements Program.

---

## The TIP Development Process

---

### Financial Constraint

The projects contained in the Transportation Improvement Program (TIP) (FY 2019-2022) are derived from Acadiana's overall 25-year transportation plan. Both the TIP and the *Financially Constrained Transportation Plan* (FCTP) have been financially constrained to reflect realistic and available levels of project funding.

The projects shown for advancement in this TIP were fully discussed with the Transportation Technical Committee (TTC) and the Transportation Policy Committee (TPC). State and Federally funded projects were mutually agreed upon with DOTD as to overall merit and funding availability for inclusion in the State TIP (*STIP*).

Based on financial data obtained from DOTD, Acadiana has averaged about \$8,475,464 annually in Federal and State funding, including Interstate funds. A computerized record of all authorized projects covering a 20-year period was obtained from DOTD.

Projects shown for urban systems greater than "200 k" (areas greater than 200,000 population) funding are also financially constrained, reflecting the annual attributable amount (approximately \$6,000,000 in FY19-22). This \$6,000,000 requires a 20% local match. If the project in question is a State project sometimes the state will provide the local match. In all other projects is incumbent upon the MPO to find the match.

### Transit

On the transit side, majority of the project funding is based on (*Section 5307 FTA Formula*) formula grant for *operating assistance and capital acquisition* that is identified annually in the *Federal Register* as being approximately \$500,000 for the Acadiana Urbanized Area. Additional *discretionary* capital grant (*Section 5339 FTA Discretionary*) averaging \$200,000 has been applied to various transit projects in the last four years.

Matching funds for transit projects come from the entity requesting. Non-formula federal funds (*Section 5339 FTA Discretionary*) are only programmed if these projects are in a high priority area such as bus replacement, bus facilities, or if the projects are identified in current or pending *congressional* authorizations. In summary, the projects contained in the TIP reflect a single agreed upon master program of projects that was developed jointly with the local governments and the Louisiana State Department of Transportation and Development. The Acadiana MPO has placed high priority on projects intended to improve the overall economic competitiveness of the area, particularly those projects which significantly enhance the overall movement efficiency of goods and resources.

### Prioritization of Projects

The Acadiana Planning Commission, in close consultation and cooperation with LA DOTD, prepares a draft of the TIP document whenever it is amended. This amended document is widely distributed for public review and comments (see public involvement section) and is presented to

the MPO's transportation committees for review, comment, and concurrence. In addition to local planning and public works professionals, the Transportation Technical Committee consists of representatives from modal agencies, including airport and public transit officials. A roster of the Transportation Technical Committee (TTC), and Transportation Policy Committee (TPC) Memberships is listed in Appendix B. Projects contained in the TIP document are organized in accordance with the federal fiscal year that begins October 1, 2014. The TIP covers the four-year period: FY 2018-2019; FY2019-2020; FY2020-2021; and, FY 2021-2022. The TIP may also show future years.

Wherever possible, construction let dates are shown to advise local officials and the public as to when construction is likely to begin. The Acadiana Planning Commission staff works very closely with LA DOTD staff and other vested entities to establish realistic project priorities, based on where the project rests in the implementation pipeline. Meetings are held with La DOTD to monitor the actual status of TIP projects and scheduled letting dates. These meetings are called Whiteboard meetings and are held on an annual basis. These meetings have helped Acadiana to establish firm project priorities rather than "paper" priorities. This review considers important factors such as the status of environmental clearances, survey work, preliminary plans, right-of-way, utilities, advance checkpoints and final plan preparation. When taken together, these criteria establish the relevant let date and therefore the priority order for implementation of TIP projects. The cost of the project, type of funding, and the availability of proposed funding are also considered in priority setting. The above project information is made available to the Technical Committee, or the public upon request, and project work status is utilized extensively in establishing the priority program. The draft TIP is also presented to the TTC and TPC for review and input, along with any citizens' comments received prior to finalization of priorities.

The *Acadiana MPO's Project Selection process* has been newly created since the MPO's transition to >200K. The MPO receives approximately \$6,000,000 per year under the STP > 200K funding source. Of this money about \$4,000,000 will be allocated to projects that qualify and are selected through this process (funding amounts subject to change). The MPO accepts applications for federal funds through local and regional government jurisdictions. Entities that fill out applications must work with the local respective municipality they are in or the Louisiana Department of Transportation to sponsor a project.

Solicitation letters and project applications will be sent annually to the jurisdictions within the MPO area. The MPO will give the jurisdictions an adequate amount of time to process the applications and return. After returning the Projects will be graded according to the matrix in the *TIP Handbook*. This matrix includes qualifiable measures such as current pavement quality in order to mesh with performance measure targets and to prioritize projects that can show an improvement for the targets set. The recommendations of the MPO will be vetted first through the Project Evaluation Subcommittee, then adopted through normal MPO Process. Jurisdictions acting as the Local Public Agency (LPA) will be responsible for these projects. The TIP and these LPA projects will be reviewed semi-annually for reasonableness. If projects are deemed to be non-compliant in advancement, then they will be removed or pushed back into a later fiscal year.

### **Relationship of TIP to Long-Range Transportation Plan**

Projects contained in Acadiana MPO's TIP have evolved through the transportation planning process. This analysis process is based on the seven planning factors contained in *Fixing America's Surface Transportation act (FAST)*. These factors and the resulting analysis are utilized by the Planning Staff in the development of an integrated transportation plan and TIP for the Acadiana Metropolitan Planning Area. The 2040

Financially Constrained Transportation Plan (FCTP), contains comprehensive discussions as to how these factors are being specifically applied in the Urban Area to develop a transportation system that facilitates the efficient, economic movement of people and goods.

### **Relationship of the TIP to the Air-Quality Conformity**

On October 14, 1994, the Acadiana Urbanized Area was re-designated as an Air Quality (ozone) Attainment with Minimal Maintenance area by the U.S. Environmental Protection Agency. This designation reflects the fact that the Acadiana Metropolitan Area suffered some ozone problems in the 1970 and 80's but has met the *National Ambient Air Quality Standards* (NAAQS) in recent years. This designation recognizes the area's new status as an Attainment Area but requires a continued review of projects likely to have detrimental air quality impacts.

The previous TIP as adopted March 27, 2015 and the Financially Constrained Transportation Plan (FCTP) (Long-Range Transportation Plan) were analyzed for their conformity with the *State Implementation Plan* for Air Quality Attainment (SIP) and with each amendment to these Plans. The Air Quality Conformity Analysis outcome being consistent with the *Clean Air Act Amendments of 1990* (CAAA) to conformity regulations indicated that FCTP and TIP resulted in a net air quality benefit to the region.

The previous TIP projects are consistent with the FCTP and with only minor exceptions were included in the previous Conformity Analysis. The regionally significant projects added, that will increase capacity, have been tested for Air Quality conformity. All other amendments have been for either projects that fall within categorical exclusions, represent minor reprioritization of existing projects, or are not regionally significant. Projects involving roadway reconstruction work were included for 2019-2022.

Therefore, the Transportation Policy Committee of the Metropolitan Planning Organization for the Acadiana MPO has determined that the FY2019-2022 TIP is substantially identical to the TIP and FCTP in the Air Quality Conformity Analysis and therefore is in conformity with the STIP.

### **Public Involvement**

Citizen participation has been encouraged throughout the formulation of the TIP, FCTP, and CTP. The Metropolitan Planning Organization has made use of local newspapers, neighborhood meetings and extensive mail outs to inform citizens regarding the planning process, the transportation plans, important projects, and to promote alternative transportation modes. On its own initiative, several publications of project maps were displayed by the MPO at locations throughout Acadiana. As for specific projects, special meetings were scheduled and held to address the public's concerns.

The MPO has also made use of local newspapers to inform the public of important regional projects and to promote alternative transportation modes including transit bus service, bicycling, etc. Public meeting notices on the FCTP, CTP and TIP, any amendments thereto, and the Acadiana MPO's *Unified Planning Work Program* (UPWP) for Transportation Planning are placed at various public site locations for citizen review and comment.

### **Distribution of TIP Document for Public Review**

Copies of the draft TIP were placed at nine governmental offices and libraries throughout the metropolitan area at least 15 days prior to adoption by the Transportation Policy Committee for citizen review, input and comment. The public is also afforded the opportunity to express their comments directly to the Citizen Advisory Committee, Transportation Technical Committee (TTC), and Transportation Policy Committee (TPC) for the Metropolitan Study Area on the TIP document prior to official action. No public comment was made for the adoption of this TIP.

### **Adoption of the TIP**

Public meetings were held to adopt the 2019-2022 TIP. These meetings were standard MPO TTC and TPC meetings which are open to the public. The TTC adopted the TIP on 7/4/18 and the TPC adopted on 7/18/18.

### **Project Listings**

The tables starting on page 22 represent both the Highway Element, Call for Projects Element, and the Transit Element, all covering the same period for the TIP. Additionally, a table with projects let in previous years is included in the Appendix. All projects that were in the previous TIP having been authorized are listed. Because of the timing of the TIP, a listing of the projects that are scheduled for authorization in the last quarter will be included. This list will contain a note that some of the projects may carry over to the next fiscal year. This note allows the DOTD to reschedule projects in the last quarter, after the TIP has been completed, without having to amend the TIP. Secondly, a list of projects that have been removed from the TIP will be included. This is important in identifying projects that may affect the conformity for nonattainment and maintenance areas or projects that cannot be scheduled for various reasons. This section will illustrate the project and the reason for project moving as well as the regional significance of this project.

While every effort has been made to develop this document using the latest information available at the time, it is recognized that there are uncertainties in the development of projects, right-of-way acquisition, relocation of utilities, acquisition of permits, costs, funding availability, etc. Therefore, the Policy Committee has no objection to phases of projects moving with the TIP of STIP as necessitated by the situation and gives its approval to the MPO staff to make those necessary changes without action by the Policy Committee.

## Procedures to Amend or Administrative Modify the Louisiana Statewide (STIP) and Transportation Improvement Programs (TIPs)

The following procedures are applicable for processing amendments or administrative modifications to the Statewide (STIP) or Metropolitan Transportation Improvement Programs (TIPs). In accordance with the provisions of 23 CFR 450.218 (b), the STIP shall be developed in cooperation with the MPO designated for a metropolitan area. Each metropolitan Transportation Improvement Program (TIP) shall be included without change in the STIP, directly or by reference, after approval of the TIP by the MPO and the Governor. A metropolitan TIP in a nonattainment or maintenance area is subject to a FHWA/FTA conformity finding before inclusion in the STIP. In areas outside a metropolitan planning area but within an air quality nonattainment or maintenance area containing any part of a metropolitan area, projects must be included in the regional emissions analysis that supported the conformity determination of the associated metropolitan TIP before they are added to the STIP.

In accordance with 23 CFR 450.218(n), projects in any of the first four years of the STIP may be moved to any other of the first four years of the STIP subject to the project selection requirements of 23 CFR 450.222. Such modifications do not require formal approval, provided expedited project selection procedures have been adopted in accordance with 23 CFR 450.222 and the required interagency consultation or coordination is accomplished and documented.

An **Administrative Modification** is a minor revision to a long-range statewide or metropolitan transportation plan, Transportation Improvement Program (TIP), or Statewide Transportation Improvement Program (STIP) that includes minor changes to project phase costs, funding sources of previously included projects and project phase initiation dates. An administrative modification is a revision that does not require public review and comment, re-demonstration of fiscal constraint or a conformity determination (in nonattainment and maintenance areas).

### Administrative Modification thresholds include:

1. Revisions to a project description without changing the project scope or which do not conflict with the pertinent environmental document;
2. Minor changes to the cost of a project phase (Feasibility, Environmental, R/W, Utility Relocation, Engineering, Construction):
  - Funding changes are limited to \$1,250,000 for project phases ≤\$5,000,000.
  - For project phases >\$5,000,000, an administrative modification is limited to budget changes of less than 25% in funding.
3. Minor changes to funding sources of previously included project phases that do not affect fiscal constraint of the STIP or the ability to complete the project as initially described;
4. Minor changes to project phase initiation dates as long as the project stays within the approved STIP/TIP timeframe and do not affect fiscal constraint of the STIP or the ability to complete the project as initially described. 23 CFR 450.218(n);

5. A change in the project or implementing agency;
6. A split or combination of individually listed projects; as long as cost, schedule, and scope remain unchanged;
7. The addition or deletion of projects from grouped project (line item) listings as long as the line item total funding amounts stay within the guidelines in number two above.

Administrative modifications can be processed in accordance with these procedures provided that:

1. It does not affect the air quality conformity determination, including timely implementation of Transportation Control Measures (TCMs),  
**and;**
2. It does not impact financial constraint of the STIP or the ability to complete the projects as described.

Each MPO approved administrative modification needs to be published online separately from TIP amendments. The MPO should summarize this as an information item to the MPO committee members each month. The MPO Board may delegate approval of administrative modifications to the MPO's Executive Director. If the MPO Board delegates approval of administrative modifications to the Executive Director, the MPO will need to provide copies of the delegation to the LADOTD, FHWA, and FTA. Any administrative modifications will be forwarded to the LADOTD Transportation Planning Section and Public Transportation Section for approval on behalf of the Governor.

If a project affected by an administrative modification is located within the planning boundaries of an MPO, the MPO must first generate and/or accept the administrative modification for its TIP. Once approved by the MPO, the LADOTD, on behalf of the Governor, can incorporate the administrative modification into Louisiana's STIP. The LADOTD will immediately notify the MPO, FHWA, and FTA of any approved administrative modification(s). The LADOTD can incorporate a STIP administrative modification before it is approved by the MPO as long as the TIP administrative modification process has started and if waiting for the TIP administrative modification documentation will delay the letting.

For projects in a rural area, once approved by the LADOTD, on behalf of the Governor, the administrative modification will be incorporated into Louisiana's STIP. The LADOTD will immediately notify the MPO, FHWA, and FTA of any approved administrative modification(s).

An **Amendment** is a revision to a long-range statewide or metropolitan transportation plan, TIP, or STIP that involves a major change to a project or project phase included in a metropolitan transportation plan, TIP, or STIP, including the addition or deletion of a project or a project phase, a major change in project/project phase cost or a major change in design concept or scope (e.g., changing project termini or the number of through traffic lanes). Changes to projects that are included only for illustrative purposes do not require an amendment. An amendment is a revision that requires public review and comment, re-demonstration of fiscal constraint and/or a conformity determination (for metropolitan transportation plans and TIPs involving "non-exempt" projects in nonattainment and maintenance areas). TIP amendments with proof of action must be posted on the respective MPO website within 30 days. In the context of a long-range statewide transportation plan, an amendment is a revision approved by the State in accordance with its public involvement process.

If a project affected by an amendment is located within the planning boundaries of an MPO, it must first be amended in the TIP before it can be amended in the STIP. Once approved by the LADOTD, on behalf of the Governor, the amendment will be incorporated into Louisiana's STIP. The LADOTD will immediately notify the MPO, FHWA, and FTA of any approved amendment(s).

**Amendments:** are all other changes to STIP/TIPs that are outside of the administrative modification listed above.

### **Timeline for Amendment Approval**

When an amendment is sent to the FHWA, it will take a maximum of two weeks to be processed. The FHWA can partially approve an amendment on a project by project basis. Any project or phase of a project not approved will be resubmitted once questions and/or concerns have been resolved.

### **Dispute Resolution**

If a question arises regarding the interpretation of an administrative modification or an amendment; the LADOTD, FHWA, FTA and MPO, as appropriate, will work to resolve the issue in coordination with each other. If after consultation, the parties disagree on the definition of what constitutes an administrative modification or an amendment, the final decision rests with the FTA for transit projects and FHWA for highway projects.

## Quick Reference Chart for Amendments vs. Modifications

Administrative Modification	Amendment
Revision of a project description that does not significantly change the project design concept and/or scope	Major changes to a project including the addition or deletion of a project
Minor changes to project/project phase cost; applies to feasibility, environmental, R/W, utility relocation, engineering, construction <ul style="list-style-type: none"> <li>• Funding changes are limited to \$1,250,000 for projects for ≤\$5,000,000</li> <li>• For projects &gt;\$5,000,000 an administrative modification is classified as a change of less than 25% in funding</li> </ul>	Major changes in project costs, project/project phase initiation dates, or a major change in design concept or design scope <ul style="list-style-type: none"> <li>• Funding changes that are greater than \$1,250,000 for projects ≤\$5,000,000</li> <li>• Change of 25% or more in funding</li> </ul>
Minor changes to funding sources of previously included projects that do not affect fiscal constraint	Major changes to funding sources, such as adding a new federal funding source for a project not previously federally funded
Minor changes to project/project phase initiation dates as long as the project stays within the approved STIP timeframe and does not affect fiscal constraint	
A change in the project implementing agency	
A split or combination of individually listed projects; as long as cost, schedule, and scope remain unchanged	
The addition or deletion of projects from grouped project (line item) listings as long as the total funding amounts stay within the guidelines	

## Amendments and Administrative Modifications to a Line Item

**Line Items** are evaluated per phase, per fund, per year. Adding a new funding source to a phase of a line in a particular FFY would require a STIP amendment if it affected fiscal constraint (i.e. the current STIP includes \$10,000,000 or NHPP in FFY 2019 on Phase 6 of L.000053; by adding \$5,000,000 in STPFLEX to that line item in that year and phase so that after approved, the current STIP will include \$10,000,000 in NHPP and \$5,000,000 in STPFLEX in FFY 2019 on Phase 6 of L.000053). Adding a phase to a line item also requires a STIP amendment.

For a line item phase, fund, year combination with a cost >\$5,000,000, changing the amount by more than 25% on that fund, in that phase and in that year requires a STIP amendment. For a line item phase, fund, year combination with a cost >5,000,000, changing the amount less than 25% on that fund, in that phase and in that year can be done by a STIP administrative modification.

For a line item phase, fund, year combination with a cost ≤\$5,000,000, the amount can be changed up to \$1,250,000 by a STIP administrative modification; changing the amount by more than \$1,250,000 requires a STIP amendment.

Adjusting existing amounts on funds within a phase and within a particular FFY of a line item that does not affect fiscal constraint of the STIP can be done by a STIP administrative modification (i.e. changing \$10,000,000 of NHPP and \$20,000,000 of STPFLEX in FFY 2019 on Phase 6 of L.000053 to \$3,000,000 of NHPP and \$27,000,000 of STPFLEX in FFY 2019 on Phase 6 of L.000053).

Adding a fund within a phase and within a particular FFY of a line item that does not affect fiscal constraint of the STIP can be done by a STIP administrative modification (i.e. adding STCASH or NFA or STBONDS or STGEN or LOCAL because additional funding sources have been identified on a project or it has been decided that projects need to be authorized as an advanced construction project).

Splitting an existing fund into multiple funds within a phase and within a particular FFY of a line item which does not affect fiscal constraint of the STIP can be done by a STIP administrative modification (i.e. splitting \$10,000,000 of NHPP in FFY 2019 on Phase 6 of L.000053 into \$2,000,000 of NHPP and \$8,000,000 of STPFLEX in FFY 2019 on Phase 6 of L.000053; total remains \$10,000,000).

## Integration of Performance Measures

### National Performance Goals

A key feature of the Fixing America’s Surface Transportation (FAST) Act is the establishment of a performance-and-outcome-based program, originally introduced through the Moving Ahead for Progress in the 21<sup>st</sup> Century (MAP-21) Act.

The objective of this performance-and-outcome-based program is for States and Metropolitan Planning Organizations to invest resources in projects that collectively will make progress toward the achievement of the national goals as identified below:

Goal area	National goal
Safety	To achieve a significant reduction in traffic fatalities and serious injuries on all public roads
Infrastructure condition	To maintain the highway infrastructure asset system in a state of good repair
Congestion reduction	To achieve a significant reduction in congestion on the National Highway System
System reliability	To improve the efficiency of the surface transportation system
Freight movement and economic vitality	To improve the national freight network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development
Environmental sustainability	To enhance the performance of the transportation system while protecting and enhancing the natural environment
Reduced project delivery delays	To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies’ work practices

### Performance measures

Requires the Secretary, in consultation with States, metropolitan planning organizations (MPOs), and other stakeholders, to establish performance measures in the areas listed below. Provides for DOT to establish such measures within 18 months of enactment, and prohibits DOT from establishing additional performance measures. [§1203; 23 USC 150(c)]

- Pavement condition on the Interstate System and on remainder of the National Highway System (NHS)
- Performance of the Interstate System and the remainder of the NHS
- Bridge condition on the NHS
- Fatalities and serious injuries—both number and rate per vehicle mile traveled—on all public roads
- Traffic congestion

- On-road mobile source emissions
- Freight movement on the Interstate System

**National Performance Goals**

A key feature of the Fixing America’s Surface Transportation (FAST) Act is the establishment of a performance-and-outcome-based program, originally introduced through the Moving Ahead for Progress in the 21st Century (MAP-21) Act. Freight movement on the Interstate System.

- coordinate with an MPO when setting performance targets for the area represented by that MPO; and
- coordinate with public transportation providers when setting performance targets in an urbanized area not represented by an MPO. [§1202; 23 USC 135(d)(2)(B)]
- *Setting of MPO targets.* Within 180 days of States or providers of public transportation setting performance targets, requires MPOs to set performance targets in relation to the performance measures (where applicable). To ensure consistency, each MPO must, to the maximum extent practicable, coordinate with the relevant State and public transportation providers when setting performance targets. [§1201; 23 USC 134(h)(2)].

Source: <https://www.fhwa.dot.gov/map21/factsheets/pm.cfm>

**Adopted MPO Performance Measures**

The Acadiana MPO has now adopted all three of the required Performance measures. PM-1 ( Safety), PM-2 (Bridge and Pavement condition) and PM-3 (Travel time reliability (freight and passenger vehicle)).

**Safety:**

In December of 2017 the Acadiana MPO adopted the La DOTD targets for 2018. On a yearly basis the state targets will be revised.

<b><u>Louisiana DOTD 2018</u></b>			
<b><u>Targets</u></b>			
	<b><u>2016</u></b>	<b><u>2018 Target</u></b>	<b><u>Reduction</u></b>
Fatalities	758	721	37
Fatality Rate	1.55	1.49	.06
Serious Injuries	1401	1344	57
Serious Injury Rate	2.86	2.8	.06
Non-Motorized Fatalities and Serious Injuries	346	311	35

<b><u>FY18-21 TIP Projects Expected to Contribute to Improved Safety in the Acadiana MPO Region</u></b>		
<b>State</b>	<b>Number of Projects</b>	<b>Sum of Programmed Cost</b>
Louisiana	3	\$16,800,350

**Pavement and Bridge Condition:**

In September of 2018 following the DOTD’s adoption of the Transportation Asset Management Plan (TAMP) the Acadiana MPO adopted a resolution to support the states 2 and 4 year targets for pavement and bridge conditions.

The current mileage of the National Highway System (NHS) in the Lafayette Metropolitan Planning Area (MPA) is as follows:

Interstate NHS = 32.93 miles

Non Interstate state owned NHS = 62.17 miles

Non Interstate locally owned NHS = 23.35 miles

As defined by Federal goodness the current pavement conditions on Non Interstate and Interstate NHS are as follows:

The current bridges in the MPA on the NHS are as follows:

<b>Deck Area</b>	<b>1,016,742.6</b>	<b>976,090.4</b>	<b>42,266.0</b>
<b>% Deck Area</b>	<b>49.9%</b>	<b>48.0%</b>	<b>2.1%</b>
	<b>Good</b>	<b>Fair</b>	<b>Poor</b>

The MPO will reevaluate these targets when the data is made available. The adopted targets are as follows:

**Pavements:**

<b><u>Louisiana DOTD 2018 Targets</u></b>		
	<b><u>2020 Target (%)</u></b>	<b><u>2022 Target (%)</u></b>
Good (minimum %)	20	20
Poor (maximum %)	20	20

**Bridges:**

<b><u>Louisiana DOTD 2018 Targets</u></b>		
	<b><u>2020 Target (%)</u></b>	<b><u>2022 Target (%)</u></b>
Good (minimum %)	35	30
Poor (maximum %)	9.9	9.9

**Travel Time Reliability and Freight Mobility:**

In September of 2018 the MPO's adopted all Travel Time Reliability and Freight Mobility Performance targets.

The MPO's are responsible to adopt targets for all interstate and non interstate NHS routes in their respective area's. In 2018 DOTD procured a data set of travel speed in an easy to use online platform that allowed the MPO's to calculate all measures required by FHWA. This data set however does not include all NHS (non interstate) routes. The MPO's are only required to set 4 year targets for Reliability indices and and percentages, but decided to match the DOTD and set 2 and 4 year targets.

The three measures required are:

- Travel Time Reliability for Interstate (% of person miles reliable)
- Travel Time Reliability for Non Interstate (% of person miles reliable)
- Truck reliability index for Interstate (Level of Truck Travel time Reliability)

The Acadiana ran the analysis and found the following:

- Travel Time Reliability for Interstate (% of person miles reliable) was 100%
- Travel Time Reliability for Non Interstate (% of person miles reliable) was 95.4%
- Truck reliability index for Interstate (Level of Truck Travel time Reliability) was 1.13

Based off of this analysis the Acadiana MPO adopted conservative targets knowing that when the full data set comes in the % of reliability could be reduced.

The adopted measures:

<b>Travel Time Reliability (Passenger and freight) and Mobility Index</b>						
	<b>2020 Target (LA DOTD)</b>	<b>2022 Target (LA DOTD)</b>	<b>2020 Target (MPO)</b>	<b>2022 Target (MPO)</b>	<b>Difference 2020 (MPO-DOTD)</b>	<b>Difference 2022 (MPO-DOTD)</b>
Travel Time Reliability Interstates (% in person miles)	88.9	88.4	90	90	+1.1	+1.6
Travel Time Reliability Non Interstates (% in person miles)	86.6	86.6	90	90	+3.4	+3.4
Truck Travel Time Reliability index (index)	1.37	1.40	1.13	1.13	-.24	-.27

**Transit Performance Measures:**

The Lafayette Transit System adopted their Transit Plan on 10/29/18. The MPO adopted LTS Performance measure goals into its 2019-2022 TIP via Amendment #2.

The adopted measures:

Performance Targets & Measures

<b>Asset Category - Performance Measure</b>	<b>Asset Class</b>	<b>2019 Target</b>	<b>2020 Target</b>	<b>2021 Target</b>	<b>2022 Target</b>	<b>2023 Target</b>
<b>REVENUE VEHICLES</b>						
	<b>AB - Articulated Bus</b>	N/A				
	<b>AO - Automobile</b>	N/A				
	<b>BR - Over-the-road Bus</b>	N/A				
	<b>BU - Bus</b>	28%	25%	20%	15%	15%
	<b>CU - Cutaway Bus</b>	33%	25%	20%	15%	10%

EQUIPMENT		2019	2020	2021	2022	2023
	<b>Non Revenue/Service Automobile</b>	16%	15%	15%	12%	10%
